

TRAIN. SHOOT. LOG.
DETAILS MATTER

REED & WARD'S CCW GUARDIAN

“ I used to keep a spiral notebook in my range bag so I could keep a log of my training. I kept separate records of rounds fired and folders on my computer with pictures of my targets. CCW Guardian puts all of those features and more in your back pocket!

It's cool to be able to access pictures of your gun and targets, serial numbers, rounds fired and everything else included in the app in one place.

The data entry is very simple and straightforward.

Also, if you ever have questions or suggestions, the app team actually responds. I've personally recommended this app to every shooter I know.

This is the best app of it's kind I've seen. I would give it 6 stars if that were possible. Hoorah for CCW Guardian! I think you have helped me to become a better prepared and more responsible gun owner!”

- **Scott D.**
Premiere App User

“ Our mission & purpose is to assist CCW permit carriers to be better prepared and better protected through world class training and documentation applications.”

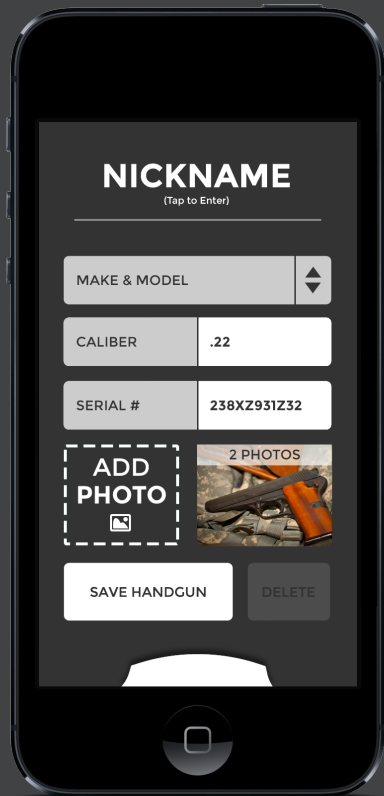

- **David C. Reed**
Co-Founder

“ A must have app for concealed carry & gun enthusiasts! I've been doing the old paper and pen but with CCW Guardian I can do so much more and with greater ease.

The app on my phone allows me to just go to the range and not have to back peddle to get my notepad or struggle to remember the details hours later!”
